

FAKE LOCK BODY PATTERNS

Basically there is only 3 lock patterns being used for the fake locks with stamped attached emblems.

All 3 of the locks are being made in the middle east.

The basic lock can be purchased for a few dollars and up depending on the body size. With a set of steel letter stamps, a piece of brass plate, some solder, and a torch or rivets you too can create anything you like.

As can be seen in the above picture you can get locks in this style from 2" up to 10".
